

Sigvard Bratlie

Data Scientist

M.Sc. student in Data Science at NMBU with 4 years of project management experience in commercial real estate. Currently researching agentic AI for the legal sector.

Timeline

Data Science (M.sc.) | NMBU

Aug 2024 - Present

- Researching context preservation in multi-turn LLM conversations for legal case management at Bahr AS for my master thesis — building a agent that maintains structured case state across extended conversations, with RAG on Norwegian law, automated document analysis, and multi-LLM support. Evaluating whether explicit state management improves accuracy over baseline models as conversation length increases.
- Built a convolutional neural network (object detection model) for Rumex identification in drone imagery. Also worked with segmentation and classical image processing techniques.
- Built an interactive dashboard web-page analyzing Norwegian electricity production/consumption vs. historical weather data, with time-series decomposition, forecasting, and outlier detection.
- Developed an end-to-end ETL pipeline scraping Finn.no, enriching with public registry data (Geonorge, Statens Vegvesen, Kartverket), and training pricing models with several different types of models on GCP.
- Built AI-valuation — an AI valuation platform where users chat with LLM agents for real estate and vehicle valuations, deployed on Google Cloud Run.
- Built an oil spill diffusion simulator with mesh-grid modeling and auto-generated MP4 visualizations.
- Statistical theory (Bayesian/frequentist, MLE, multivariate distributions), optimization (gradient descent, Newton's method, KKT, simplex), deep learning, and algorithm

design.

Project Manager | Newsec

Aug 2020 – Jul 2024

- Led end-to-end multi-million NOK construction and tenant fit-out projects, coordinating 20–30 stakeholders (engineers, contractors, architects, clients, municipalities) across residential conversions, commercial rehabilitations, and public developments in central Oslo.
- Delivered projects for major institutional and international clients (OBOS, Pareto Securities, Clarksons Platou, SBB Norden, Selvaag), covering new builds and tenant adaptations.
- Conducted technical due diligence for office, retail, industrial, and residential transactions, delivering integrated buy- and sell-side assessments.
- Managed complete procurement cycles: tenders, bid evaluation, contract negotiation/administration (NS 8407/8402), including public sector procedures and regulatory approvals.
- Handled project financials, reporting, and ensured compliance with regulations and BREEAM sustainability standards.

Engineering (B.sc.) | NTNU

Aug 2017 - Jun 2020

- B.Sc. in Structural Engineering with focus on construction management, structural design, and regulatory frameworks.
- Foundation in project planning, contract management, and navigating building regulations and public approval processes.

 Skills

Machine Learning • ANN (PyTorch & TensorFlow) • Transformers (HuggingFace) • ML (Scikit Learn, XGBoost, ++) • Agents	Cloud Computing • GCP, Azure & AWS • Data warehouse (Big Query, Snowflake) • CI/CD tools (Cloud Build, etc.)	Other Tools/Skills & Professional • FastAPI • Git • Building SDK • Streamlit
---	---	---

(Langchain/langgraph) • Data handling (Pandas, NumPy, Spark) • Plotting (Matplotlib, Seaborn, Plotly) • Computer vision (OpenCV, YOLO)	• Serverless computing (Cloud Run) • Docker • VM and Kubernetes • NoSQL DB (MongoDB, Firestore) • ++ (Secrets, IAM handling, etc.)	• Dashboards (PowerBI, Looker) • Figma • Project Management • Client Relations • Business Acumen • Reporting & Presentation
---	--	--

Projects

- [Agentic Legal AI \(Master Thesis\)](#): LLM/NLP project for legal document processing.
- [Weather & Electricity Dashboard](#): Data analysis and EDA dashboard.
- [Rumex Detection Model](#): Computer vision model using YOLO.
- [Market Data ETL Project](#): Data fetching and scraping pipeline.
- [SIBR Market](#): UI/LLM-based market interface.
