

# Sigvard Bratlie

---

## Data Scientist

M.Sc. student in Data Science at NMBU with 4 years of project management experience in commercial real estate. Working at the intersection of data, structure and business processes, with a focus on extracting value from data.

## Education

---

### Data Science (M.Sc.) | NMBU

Aug 2024 - Present (Expected June 2026)

- Researching context preservation in multi-turn LLM conversations for legal case management at Bahr AS for my master thesis — building an agent that maintains structured case state across extended conversations, with RAG on Norwegian law, automated document analysis, and multi-LLM support. Focus on structured handling of data flow, context and data quality in complex systems.
- Built a convolutional neural network (object detection model) for Rumex identification in drone imagery. Also worked with segmentation and classical image processing techniques.
- Built an interactive dashboard web-page analyzing Norwegian electricity production/consumption vs. historical weather data, with time-series decomposition, forecasting, and outlier detection.
- Developed an end-to-end ETL pipeline scraping Finn.no, enriching with public registry data (Geonorge, Statens Vegvesen, Kartverket), with focus on data quality, structuring and integration across sources, and training pricing models on GCP.
- Built AI-valuation — an AI valuation platform where users interact with models for real estate and vehicle valuations, deployed on Google Cloud Run.
- Built an oil spill diffusion simulator with mesh-grid modeling and auto-generated MP4 visualizations.
- Coursework includes statistical theory (Bayesian/frequentist, MLE, multivariate distributions), optimization (gradient descent, Newton's method, KKT, simplex),

deep learning, and algorithm design.

## **Economics & Business (Year Study) | BI Norwegian Business School**

**Aug 2021 – June 2022 (Completed parallel to full-time position at Newsec)**

- Completed 60 ECTS credits with a focus on business economics, financial accounting, and marketing management.

## **Engineering (B.Sc.) | NTNU**

**Aug 2017 - Jun 2020**

- B.Sc. in Structural Engineering with focus on construction management, structural design, and regulatory frameworks.
- Foundation in project planning, contract management, and regulatory processes.

## **EXPERIENCE**

---

### **Project Manager | Newsec**

**Aug 2020 – Oct 2024**

- Led end-to-end multi-million NOK construction and tenant fit-out projects, coordinating 20–30 stakeholders across disciplines.
- Responsible for project structure, progress tracking, reporting and cost control across multiple parallel projects.
- Delivered projects for major institutional and international clients (OBOS, Pareto Securities, Clarksons Platou, SBB Norden, Selvaag).
- Conducted technical due diligence for transactions, focusing on risk, documentation and decision support.
- Managed complete procurement cycles: tenders, bid evaluation, contract negotiation/administration, including regulatory processes and compliance.

### **Project Manager | Independent Consultant**

**Oct 2024 - Present (Parallel to full-time master studies)**

- Providing technical advisory and project management for property development projects upon request from former clients.

- Working with project structuring, coordination and execution in smaller, targeted engagements.

## Skills

|                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                         |
