

Sigvard Bratlie

Technology & AI Project Professional

M.Sc. candidate in Data Science with 4 years of project leadership experience. Bridging business needs, AI, and software development.

Education

Data Science (M.Sc.) | NMBU

Aug 2024 – Present (Expected June 2026)

- Master thesis: Agent-based LLM system for structured legal case management. Designing stateful AI workflows with RAG, document analysis and evaluation of model robustness over long conversations.
- Built and deployed multiple end-to-end AI systems (LLM apps, ETL pipelines, valuation platform, ML models in production).
- Strong foundation in statistics, optimization, machine learning, deep learning and algorithm design.

Economics & Business | BI Norwegian Business School

2021–2022 (60 ECTS, parallel to full-time work)

- Financial accounting, business economics, marketing and organizational understanding.

B.Sc. Engineering | NTNU

2017–2020

- Structural engineering with focus on project execution, contracts and regulatory processes.

Experience

Project Manager | Newsec

Aug 2020 – Oct 2024

- Led multi-million NOK projects end-to-end, coordinating 20–30 stakeholders across engineering, finance, legal and public authorities.
- Responsible for budgeting, cost control, risk management and executive reporting.
- Conducted technical due diligence for large real estate transactions (buy- and sell-side).
- Managed full procurement cycles, contract negotiations and vendor follow-up.

Strong experience translating complex technical matters into decision-ready material for management and investors.

Independent Consultant

Oct 2024 – Present (Parallel to M.Sc.)

- Providing advisory and execution support for development projects.
- Focus on structured planning, stakeholder coordination and value-driven decision making.

Selected Technology & AI Work

- Built LLM-based applications with authentication, APIs and cloud deployment.
- Designed ETL pipelines combining web data and public registries, with automated modeling and evaluation.
- Developed internal tools and AI workflows to automate analysis and reporting.
- Comfortable prototyping quickly to test ideas before scaling.

Technical Skills

Programming & Systems

Python, FastAPI, TypeScript (basic), SQL, Git, API integrations

AI & Data

LLMs (OpenAI, Claude, Gemini), LangChain/LangGraph, RAG systems, ML (scikit-learn, XGBoost), PyTorch

Cloud & DevOps

Docker, CI/CD, GCP, Azure, Kubernetes (basic), data warehousing (BigQuery, Snowflake)

Profile

- Strong ownership mindset – used to delivering under responsibility
 - Curious about finance, markets and AI-driven knowledge work
 - Comfortable both managing projects and getting hands-on with data or prototypes
 - Fluent in Norwegian and English
-
